

New orders for Clad Induction Bends in cooperation with EBK for projects in Malaysia and Australia

17.10.2023 | Article of Salzgitter Mannesmann Grobblech GmbHs Pipe Bending Plant

SMGB's Pipe Bending Plant has once again received two significant orders for Clad Induction Bends. Both orders are carried out in close cooperation with the pipe manufacturer EBK, who supplies the pipeline pipes for the two projects in Malaysia and Australia.

Both contracts include more than 80 bends in material grade API 5L X65 + UNS 00625, in the size range of 16" – 34" and wall thicknesses of up to 52mm. The bends are being produced with 5D and 3D radius.

Our expertise in the field of clad Induction Bends enables us to develop precise solutions for demanding requirements. We are proud that our customers choose us as their preferred supplier.

These projects in Malaysia and Australia are technologically demanding and require high-quality products. Our engineers and experts are ready to ensure that both orders are successfully completed and that the bends are delivered on time.

Our cooperation with EBK ensures a seamless integration of line pipes and Clad Induction Bends to meet the requirements of these projects.

These assignments are another proof of confidence in our high-quality products and excellent service to our customers.
